## **SUPERAntiSpyware Announces Educational License Special**

**SUPERAntiSpyware.com helps schools during difficult economic times with FREE lifetime updates on educational licenses in addition to discounted student versions.**

EUGENE, OR (April 23, 2010) – SUPERAntiSpyware.com, a Pacific Northwest developer of state-of-the-art security software, has announced a special offer for educational institutions. From now through August 1, 2010, all SUPERAntiSpyware multi-user licenses sold to educational clients will be upgraded to a lifetime subscription with no renewal fees at no additional charge.

“Economic hardship and budget cuts are an everyday reality for school systems at all levels,” said Nick Skrepetos, founder of SUPERAntiSpyware.com. “We highly value the role that education plays in communities worldwide, and we want to support schools in their efforts to provide quality education while balancing their tight and shrinking budgets. Managing high-priced software renewal fees is simply not practical for schools in today’s economic climate. We want to help.”

Skrepetos continued, “Not only are managing expensive license and renewal fees challenging for schools, but the danger of spyware infections themselves pose a multi-million dollar threat to our educational system. Without proper protection, schools are at risk of computer infections that can not only rob them of valuable classroom and instructional time, but may also require them to incur costly repair bills.”

Additionally, SUPERAntiSpyware will include one Technician’s License for its new portable scanner with each educational license at no additional cost. The portable scanner harnesses the same powerful anti-spyware engine as the Professional Edition of SUPERAntiSpyware and references a spyware definition database that is updated at least once per day. It is free for personal use, and technician and corporate licenses are available. SUPERAntiSpyware Portable can be downloaded from <http://www.superantispyware.com/portable>

For more information or to take part in the educational license promotion, contact [sales@superantispyware.com](mailto:sales@superantispyware.com).

SUPERAntiSpyware, in use by nearly 30 million users worldwide, is an innovative product that protects users from Spyware, Malware, Adware, Trojans, Rootkits, Homepage Hi-Jackers, Worms, Dialers and Parasites. SUPERAntiSpyware focuses on detecting hard to remove spyware which other products often miss, or are unable to safely detect and remove.

The SUPERAntiSpyware Free Edition, a 100% free product, will detect and remove potentially harmful software from a user’s computer. In addition, the Professional version provides real-time protection against the installation of new threats, scheduled scanning and removal of threats as well as additional protective features not available in the free edition. SUPERAntiSpyware Free and Professional Editions will detect and remove the latest rogue/fake anti-spyware products as well as over 1,500,000 other harmful application components. SUPERAntiSpyware definitions are updated daily to protect users against the latest zero-day threats.

SUPERAntiSpyware is used by computer technicians worldwide to clean end user systems at companies such as Dell, HP, and AT&T. SUPERAntiSpyware is also recommended on popular security forums such as MajorGeeks.com, Wilders Security and thousands more. SUPERAntiSpyware Professional is priced at \$29.95 for the general public and includes updates for one year. SUPERAntiSpyware is available for immediate download from [www.superantispyware.com](http://www.superantispyware.com). SUPERAntiSpyware is supported by Windows 2000, XP Home/Pro, Media Center, Server 2003, Server 2008, Vista and Windows 7.
